

For Chapter 6, include a hover tool tip for each treatment method giving a brief explanation as to what the treatment actually includes. Do not change anything outside of this request.

5:58 PM  

On it! I will add hover tooltips to every bar in Chapter 6 only and leave everything else exactly as it is.

Here is what each tooltip will say when a user hovers over a bar:

Detox - Hospital — Medical detoxification in a hospital setting. Patients are supervised 24/7 by medical staff while their body clears the substance. Best for severe withdrawal cases where medical complications are likely.

Detox - Residential — Detoxification in a non-hospital residential facility. Provides round the clock supervision in a home like environment. Less intensive than hospital detox but still provides full time support.
